

The background of the entire image is a photograph of several broken glass bottles lying on a light-colored, textured concrete surface. One large, clear glass bottle is the central focus, lying horizontally. To its right, a dark brown bottle is partially visible, and further right, a white bottle is also partially visible. The text is overlaid on the central clear bottle.

THE RUDE COLLECTION WILD GLASS SPIRITS

“Rude and rough, imperfect and real, craft appeal”.

WILD GLASS SPIRITS COLLECTION

**WILD
GLASS**
by ESTAL & VETRISPECIALI

Rude Collection Essence

WHEN THE SPIRITS WORLD HAS A NEED FOR NEW SPECIES

Rude design language.

The RUDE Collection is designed in a way that is perfectly recognisable and different from the rest of the spirits in the market.

- Primitive silhouettes
- Ultra-short necks (Patented CHOKER finish)
- Visually heavy light weight
- Naturally rough looking glass
- Uneven glass distribution

Aesthetic imperfections are welcome!

Patented Technology

CHOKER FINISH (ULTRA-SHORT CRAFT NECKS)

Fully exchangeable Ultra-Short necks.

The CHOKER finish process consists in an Ultra-short neck selection that provides The RUDE Collection with a distinctive craft aesthetic, allowing to expand and customise the collection in a more sustainable and cost-efficient way as the bottle necks diameter remains the same.*

MELEE

WILD GLASS SPIRITS

Aesthetic imperfections are welcome!

*CHOKER is a technology enabling Ultra-short neck finishes, that are tested, protected and patented. All trademarks and designs contained in this catalogue have licensed rights of use and may not be reproduced by third parties.

Sustainable Production

UP TO 25% REDUCED WASTE IN THE BOTTLE MANUFACTURING PROCESSES

Uneven colour, Imperfections & Conscious Lines.

The RUDE Collection is designed in a way that facilitates the manufacturing process.

Uneven colours and aesthetic imperfections are welcome, allowing for less bottles to be discarded in the manufacturing process resulting in a more eco-friendly and sustainable production.

Shape favors the glass distribution with subtle curves where usually you will find straight lines finishing on sharp edges and small radiuses, which are usually way more problematic.

Aesthetic imperfections are welcome!

SUSTAINABLE FROM CONCEPTION

Embrace imperfections reducing wasted production.

Aesthetic imperfections and slight colour variations between them do not pose a problem, on the contrary, they are more than welcome. We love them and they help us reduce wasted production up to 25%.

Sustainability, based on own innovation.

We have rewritten the paradigms of industrial milling, created new methods and patented new procedures that allow us a degree of flexibility and efficiency unthinkable until today.

WILD GLASS

Up to 100% Post Consumer Recycled glass content.

We work only with the industrial furnaces with the highest percentage of PCR (Post Consumer Recycled) glass on the market. Wild Glass bottles are not exquisite and accept all types of recovered glass.

INDUSTRIALLY STANDARD BUT ALWAYS DIFFERENT

Aesthetic imperfections are welcome!

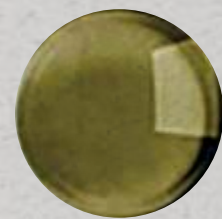

Glass colour offer.

You can choose between two different glass colours. Wild Flint Glass and Wild Dark Glass.

Our patented Wild Glass is the only one in the world that uses up to 100% Post Consumer Recycled glass content (PCR) and accepts all types of recovered glass, creating a really interesting and truly organic colour range.

**WILD FLINT
GLASS**

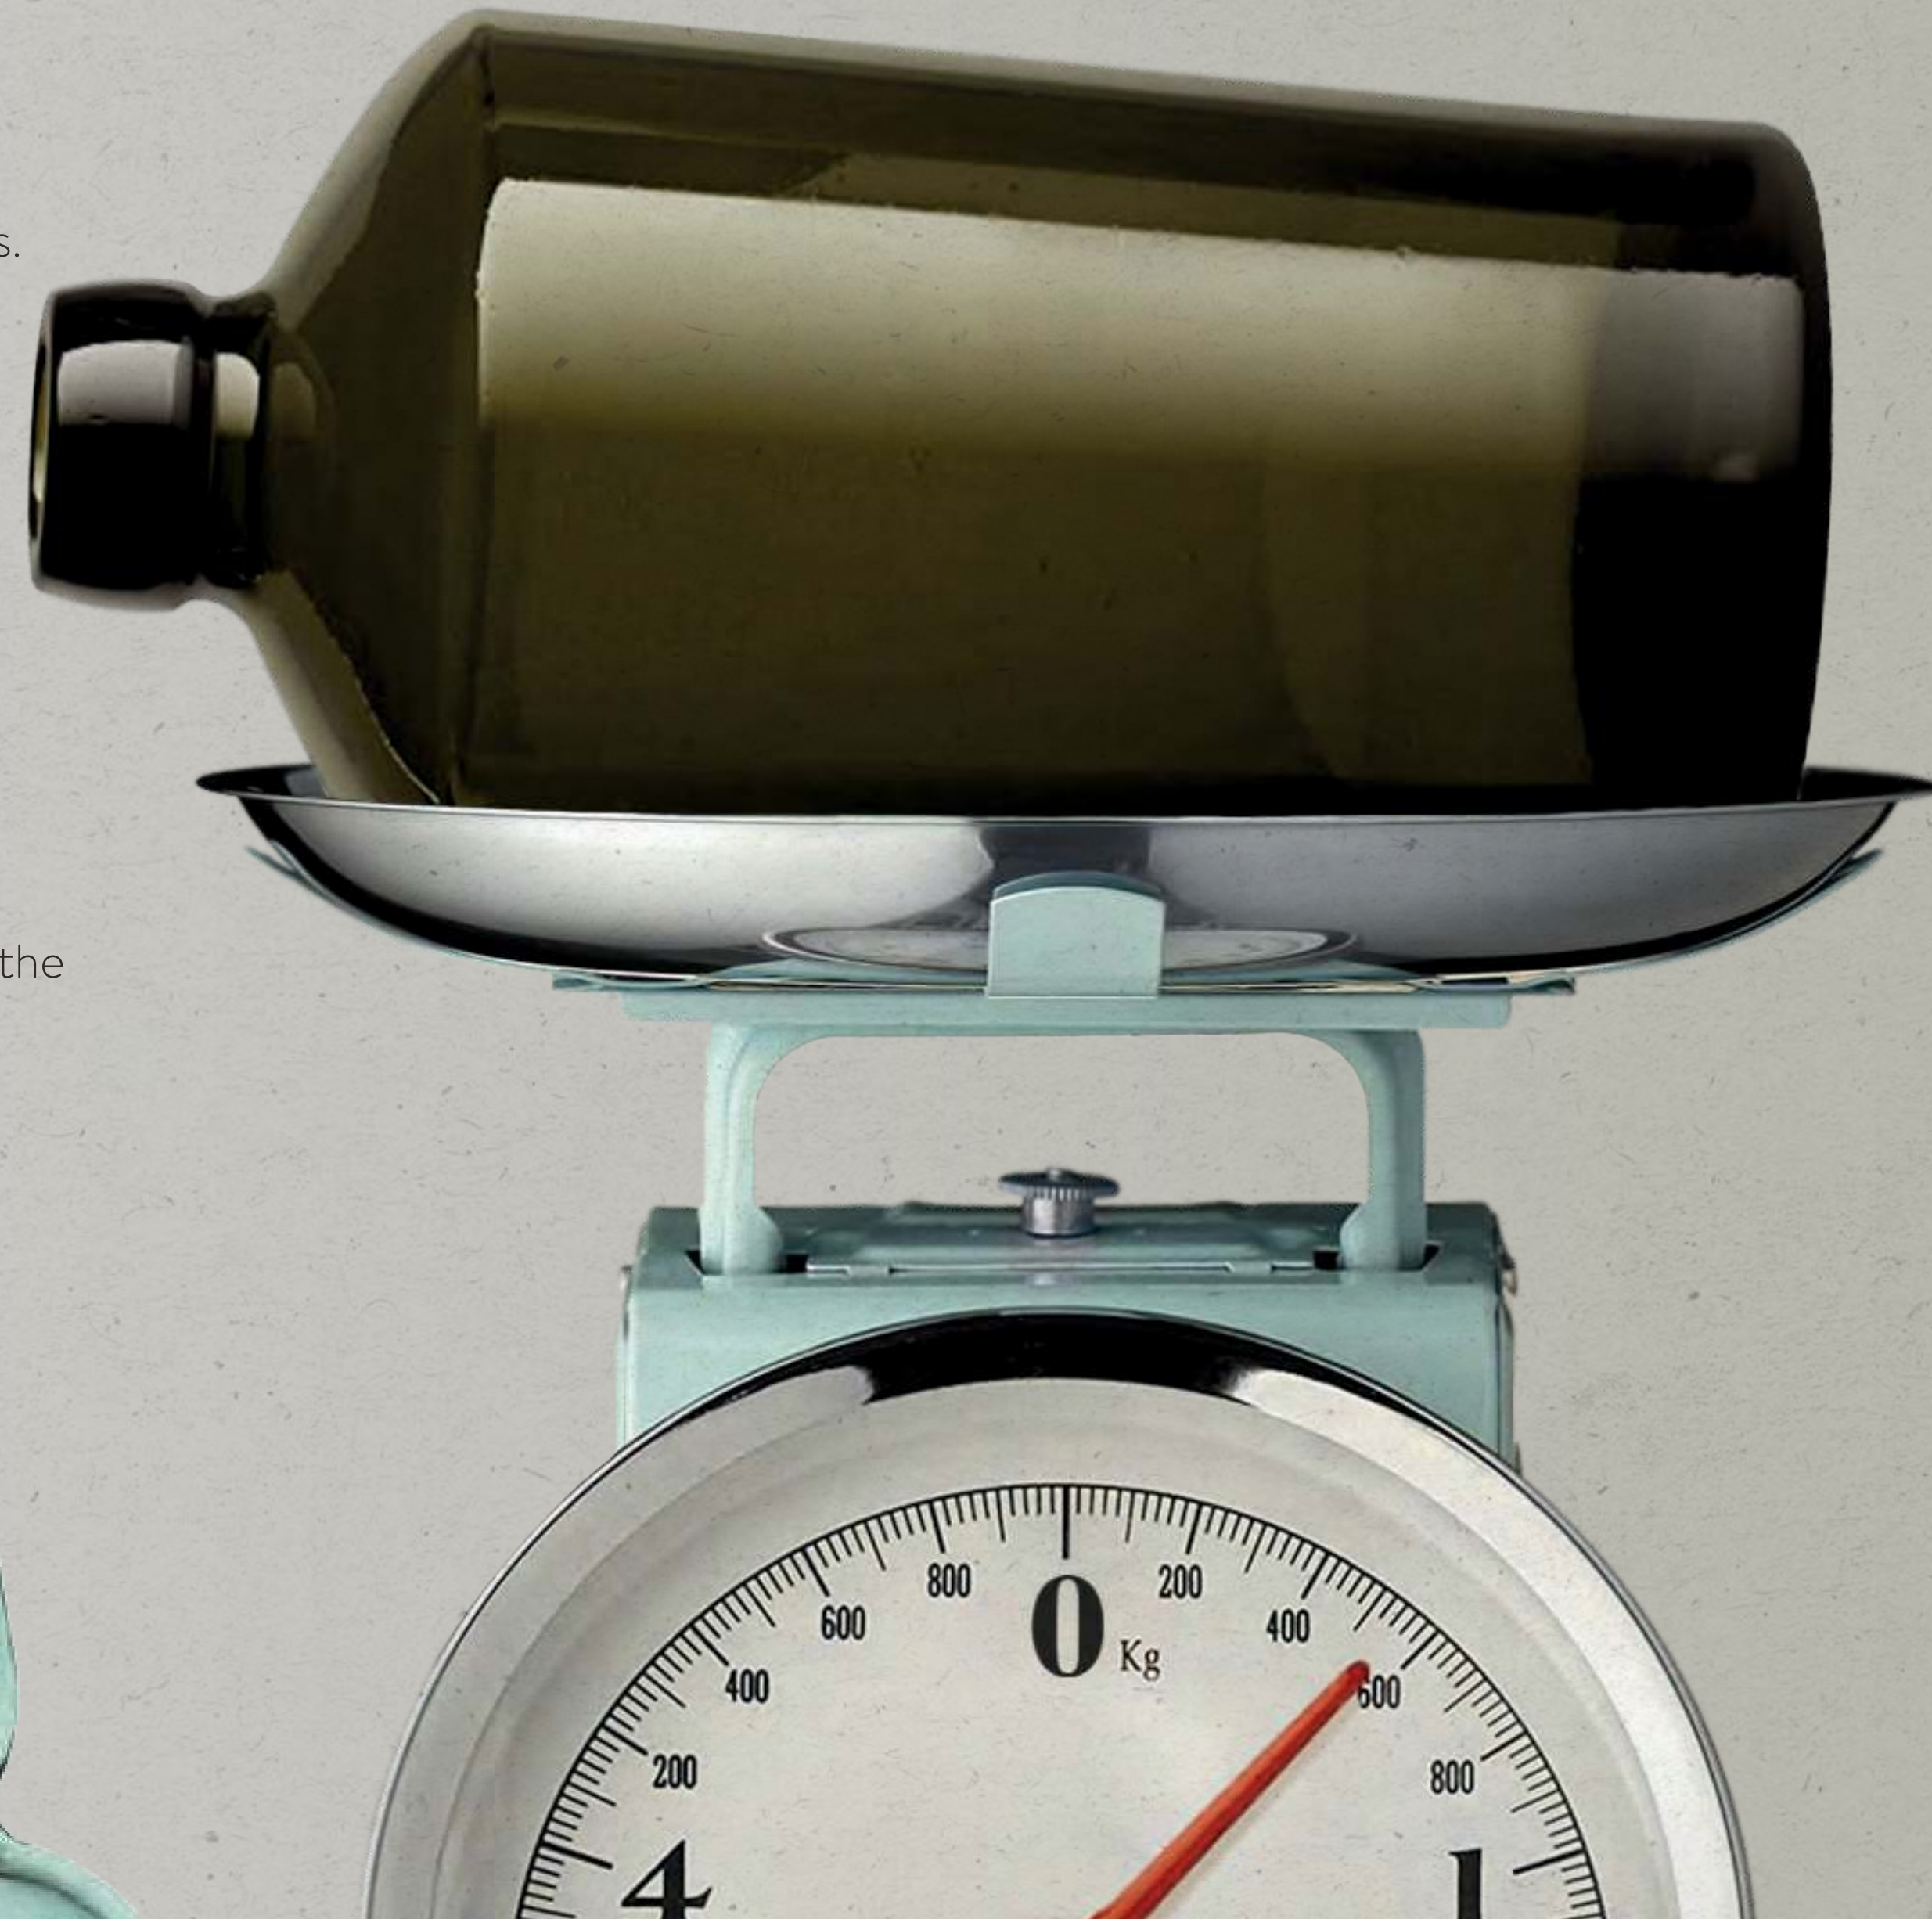

**WILD DARK
GLASS**

Visually heavy light weight.

Taking care of a light weight experience in a visually heavy bottle collection, we improve the glass distribution and help obtain a more sustainable product.

Bottle finishes offer.

The RUDE Collection from Wild Glass Spirits uses a technology called CHOKER, a common trade that provides a craft shaved appearance with Ultra-short-neck finishes that are fully interchangeable as they have the same diameter.
